

2012 - BMI Supply's 25th Anniversary Year!

# BMI WINTER SPECIALS

Throughout 2012, our monthly specials will highlight manufacturers BMI Supply has teamed with over our 25-year history. This month, we are proud to shine the spotlight on:

**CITY  
THEATRICAL**  
NEW YORK • LONDON  
www.citytheatrical.com

2.4GHz Frequency Hopping Spread Spectrum Radio

## SHoW BABY Wireless DMX

There is a brand new member of the SHoW DMX family, SHoW DMX SHoW Baby™!

SHoW DMX SHoW Baby is incredibly easy to use and incredibly affordable, while still offering the quality and advanced features of SHoW DMX Neo technology. SHoW Baby is perfect for the venue or performance where a full featured SHoW DMX system might be too sophisticated or too costly.

The SHoW DMX SHoW Baby represents a breakthrough in plug-and-play wireless DMX and RDM transmission - a single unit that can be used either as a wireless DMX transmitter or receiver. Set-up couldn't be simpler with instant plug-and-play configuration: When a DMX cable is plugged to the SHoW DMX SHoW Baby's DMX Input, the SHoW DMX SHoW Baby senses the connection and configures itself as a transmitter. If no cable is connected to the DMX Input, the SHoW Baby configures itself as a receiver.

All you need now to set up a SHoW DMX wireless DMX system is two SHoW DMX SHoW Baby units and two minutes!

# BMI's INTRODUCTORY PRICE:

# **\$299.50 EACH**

**TELEX**<sup>®</sup>

## BTR 700 Wireless Intercom

BTR700 Base Station, shown with TR700 Beltpack

The workhorse BTR700 base station supports up to four (4) TR700 belt packs in full duplex operation. The system features 1440 user-selectable frequencies. At the Telex factory, twenty-four (24) groups are pre-selected for immediate use. Bright, clear, readable LCD display puts all of the features and information you need to access at your fingertips. Without layer after layer of menus to deal with, the graphical user interface allows even new users to access, change, and store system settings as well as frequency selections. BTR700 also features a full talk/listen headset station so that an additional user can communicate on the intercom channel.

Call or email for special pricing on BTR700 and TR700!

The MS-2002 is a two (2) channel user/main station with 2.0 amp power supply and speaker in a single rack-unit. This unit serves as the central brain of a wired intercom system, often staffed by the stage manager or other production coordinator. Includes VOX option, PA key, mic kill key, combine/isolate switch, external balanced/unbalanced selector switch, dynamic mic headset jack, gooseneck mic jack, separate channel program input (DB-9F) and channel connectors (one XLR3M/F per channel plus XLR6), PA output, and (2) RCA speaker output jacks. All front keys are backlit for visibility in dark environments. This is a robust and reliable main station used throughout the entertainment and broadcast industry!

Call or email for special pricing on BTR700 and TR700!

## MS-2002 Main Station
